2020 HOME INSPECTION COURSE CATALOG

WHAT IT'S LIKE BEING A HOME INSPECTOR

Once you've completed your training and receive your ICA Certification, you're on your way to an exciting and rewarding new career as a home inspector. Having completed our Real Estate Inspection Certification Program, you'll be qualified to inspect commercial as well as residential properties. Enrollment in ICA's training program also includes course material on starting and promoting your new home inspection business.

You'll also enjoy the freedom of being your own boss and setting your own schedule. With that freedom, however, come the risks of being an entrepreneur and the responsibilities of building and maintaining a successful business. Inspection Certification Associates will always be there to help. If you have questions or need technical assistance while getting started – or for that matter, any time during your career as a home inspector – you'll have free access to ICA's reference library and training materials. Your ICA Home Inspection enrollment also includes free lifetime instructor support, so the personalized expertise you need is always just a phone call or email away.

"Hi, I wanted to let you know that I passed the national home inspection test on my first attempt! This program has been great and the additional study material for the exam was very beneficial... Thanks again and thanks for all of your help answering my previous questions"

– Andy from Fort Wayne, IN

All instructional and reference materials are available online 24/7.

- Radon and mold detection instruction and certification
- Training on thermal imaging
- Report Form Pro Nitro software that generates professional home inspection reports
- Free lifetime access to online refresher training
- Unlimited use of ICA's online reference library
- Ongoing support from instructors
- Preparation for passing the National Home Inspectors and State Inspector Exams with our online study guide and 700 practice questions
- And much more!

FREQUENTLY ASKED QUESTIONS

How much does a home inspector make?

According to the U.S. Bureau of Labor Statistics, the median annual pay for all home inspectors in 2017 was approximately \$76,000. The highest 10% brought in more than \$120,000 annually.

There are several factors that affect a home inspector's earnings, including the area of the country where the inspector is located, years of experience and whether the inspector is self-employed or works for an inspection company. Other items affecting earnings are the types of services offered and whether the inspector works part- or full-time.

What do I need to become a home inspector?

Requirements for becoming a home inspector vary by geographic area. Some states, such as Colorado and Wyoming, don't require home inspectors to be licensed. It's likely, however, that customers in these states will want verification that an inspector they're considering hiring has been properly trained and certified. [Check your state](#) to see if a license is needed in your area and if there are any additional requirements. You'll also need strong interpersonal skills, since building long-term relationships with clients, realtors, lenders and others who can send your business is crucial to your success as a home inspector.

Do I need a construction background?

Contrary to what many people think, construction experience isn't necessary to become a successful home inspector. A background in construction, engineering, architecture or related fields can, however, be helpful, especially to newly certified inspectors who are just starting out. Lack of construction experience shouldn't keep you from becoming a home inspector. Men and women of all ages and backgrounds have succeeded as

inspectors through hard work, determination and a willingness to learn. You'll gain much of what you need to know through your home inspector training classes. The rest will come from "hands-on" experience conducting home inspections.

How can I become a home inspector?

A career as a certified home inspector begins with proper training. It's important to choose the right school, since not all training programs cover the same topics. There are many schools that offer home inspector training and certification, although not all programs provide the same level of instruction. ICA's Home Inspector Training and Certification covers everything from foundations and footings to rafters and rooftops and everything in between, including plumbing, electrical and heating and air conditioning systems.

How long does it take to become a home inspector?

There are no time limits for completing ICA's Training and Certification Program. Students work at their own pace, and since all training materials are available online 24/7, you can complete your training any time and anywhere there's an Internet connection. This flexibility lets students continue to work at their current jobs until the training is completed and they're ready to begin their new careers as professional home inspectors. Most students finish the course in three to four weeks, although some complete the training in two week or less.

THE MOST ACCREDITED
