

# FLORIDA WIND MITIGATION INSPECTION COURSE

Become a Certified Wind Mitigation Inspector in Florida

Wind mitigation inspectors are in constant demand in Florida. These inspections are required by insurance providers to determine a home's ability to resist wind damage.

Wind  Mitigation

## What Is Included?

In three hours of comprehensive training, you'll learn everything you need to know in order to utilize the Uniform Mitigation Verification Inspection Form that Florida insurance companies require. ICA's course is licensed by the Florida DBPR Construction Industry Licensing Board (license #0612277).

## Why Choose ICA?

ICA specializes in training new home inspectors in Florida as well as wind mitigation training and four point inspection. The Florida Master package course helps you become a Florida wind mitigation Inspector and a licensed home inspector. You can charge more per inspection when you are dual certified.

As long as you have a valid home inspector license in Florida and have passed our wind mitigation certification course, you will automatically be qualified to offer the Wind Mit Inspections.

## Enroll in Our Florida Wind Mitigation Inspection Course Today

Learning how to become a wind mitigation inspector in Florida is convenient, affordable, and surprisingly simple. ICA will guide you through every step of the process.
